

C# - Part 1 Assignment

Assignment:

Develop a command line application which will accept file name (plain text file) as command line parameter. The application will read the file and will print following values:

1. Total number of lines
2. Total number of characters
3. Total number of words
4. Total number of special characters (values other than alphabets and numbers)

Note:

Application should only accept files with **.txt** extension.
