ASP.NET Assignment

Assignment:

Develop a quiz engine by extending the ASP.NET Part 1 assignment. This application will allow user to
1. Create quiz.
2. Add questions
3. Add answers.
4. Mark correct answer.
5. Assign users to quiz

Requirement:
1. Create quiz Page:
   This page should allow admin to create quiz. A quiz should have following properties
      a. Name (String)
      b. Total Time In Minutes (int)
      c. Is Enabled (boolean)
      d. Start Date (date)
      e. End Date (date)

   Also admin should be able to map questions with quiz. Use wizard control.

2. Add Question & Answers Page:
   This page should allow admin to add questions & its relative answers. This page should also allow marking correct answer. Use wizard control.

3. Assign Users to Quiz Page:
   This page should allow admin to assign users to selected quiz. Use wizard control.

Note:
1. Data should be stored in database
2. Make use of LINQ for manipulating database results.
3. All database queries should be written stored procedures.
4. Make use of membership
